The Lakeview and Ophir. George Yeadon paid a visit to his Lakeview and Ophir properties, at Bingham, on Sunday. From the Ophir he brought in on Sunday. From the Ophir he brought in samples which assayed 47 lead, 23 silver and \$4 gold. There are about three hundred sacks of ore now on the dump, which, it is thought, will assay high, and a shipment may be expected within a few days. Five or six carloads will probably follow each other in rapid succession when the ore does commence to move. The Lakeview, he says, is also looking remarkably and

The Dixie mine sent in another carload fore yesterday. It is said to run a little higher than usual in copper, and was readily sold. A new vein has lately been struck, and Messrs. SOMETHING NEW.

AN AMERICANIZED EDITION OF THE ENCYCLOPÆDIA BRITANNICA-FOR MORE than a year past the publishers have been collecting data for this great work, the compilation and arrangement of which have been directed by gentlemen whose ability and experience encourage the belief that the publication is in all respects an invalnable acquisition. It is contained in ten large volumes, each subject being

sc correctly and concisely, presented as to promote the highest success of the work as a standard suthority upon the topics treated. Readers, commentators, students, professional men and the public will thus be furnished with the largest measure of information in respect to science, art, literature, the law, and kindred subjects in a condensed but attractive form and without the elimination of any fact necessary to a fair statement of the case under consideration. Useless verbiage has been guarded against, and inconsequential speculation and vain repetition have been avoided. In a word, space has been suited to the subject, and the subject to the space appropriated for its treatment. Matters of interest fifty years ago, but now of comparative little consequence, have been "cut down to the bone," while the schievements of modern days in all the departments of life are given precedence. In addition to information of a general character, the work contains a complete list of American cities, together with a history of each; also reliable facts regarding their financial, social and educational ad-

vantages, manufacturing facilities, productions, population and other facts of importance and value. Biographical sketches of distinguished Americans, living and dead, brought down to date, are made a feature of the work, including those who figured during the Civil war and in other great movements. An additional feature that will commend itself is the incorporation of a series of ninety-six explanatory maps, showing every country in the world, with a separate map of every State in the Union, highly colored and revised and corrected up to the latest date. In addition to these, each volume is embellished with cuts and illustrations. The typographical work is of the best character, the volumes handsomely and substantially bound. The enterprise and public spirit to which the public is indebted for this library of information deserves the fullest complement of recognition and practical acknowledgment. Recognizing the great advantages of this invaluable work of reference, we have obtained the ex-
